ANATOMY OF A CASE KNIFE

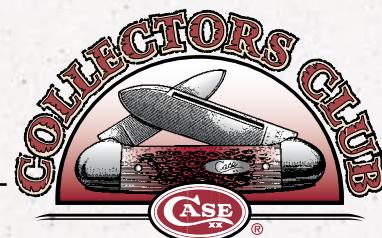

Hand-crafting a Case knife is an exercise in skill, focus, and, most importantly, patience. Roughly 160 steps go into the creation of each knife, from the handle to the blade to everything in between. To us, the process is just as important as using the finest components in the world, like rich, natural handle materials, premium-quality steel, select brass and superior nickel silver.

THE CASE TANG STAMP

It's been said that every Case knife tells a story. That story begins with the unique blade marking, or *tang stamp* applied to every Case knife, indicating its date of production. Case has used various tang stamps throughout its history, making it one of the world's most collected knife brands over time. We think you'll agree that now is the perfect time to add a new Case knife to your personal history.
