# CONTENTS

## CARBON V®

Some of our Cold Steel® knives are made from Carbon V®, a high carbon, low alloy cutlery grade steel. This steel is superior in performance to most other steels due to its chemistry and also because of the close controls that we maintain at every stage of the manufacturing process. These controls begin at the steel mill where Cold Steel® specifies the desired microstructure of the steel. Once smelted, each steel shipment is microscopically checked for structural quality, cleanliness and chemical content by an independent metallurgist not in the mill's employ. The blades are then blanked parallel to the rolling direction of the steel plate to optimize grain flow along the length of the blade. The final step is a precise heat treatment sequence that was developed by Cold Steel® specifically for this custom steel. This heat treatment process is one of our most highly guarded trade secrets. It was arrived at over several years by using an exhaustive series of practical and metallurgical tests and observations.

## AUS STAINLESS

The words "stainless steel" are misleading, because, in fact, all steel will stain or show discoloration if left in adverse conditions for a sufficient time. Steel is made "stainless" by adding Chromium and reducing its Carbon content during the smelting process. There is a serious performance trade-off with stainless steel. As the Chromium increases and the Carbon decreases, the steel becomes more "stainless". But, it also becomes more and more difficult to sharpen, and the edge-holding potential is seriously impaired. This is usually why most stainless knives are rarely razor-sharp and quickly lose what little edge they have.

In contrast, at Cold Steel® we use **AUS 8A Stainless**, a high carbon, low chromium steel that has proven itself to be the ultimate compromise between toughness and strength, edge holding, and resistance to corrosion.

**AUS 6A** is a medium to high carbon stainless which is tougher than ATS-34, 440C, ATS-55, etc., but still holds a good edge. This means it is particularly well suited for heavier, longer blades that are subjected to a lot of stress while chopping and hacking.

Like our other stainless steels, **AUS 10A** is a high carbon variety. It is equal in strength and toughness to AUS 8A but has the extraordinary advantage of an additional 20% in edge holding ability. This ability to retain a sharp edge for a longer period of time gives it a wider performance advantage over other, more common stainless steels. The only knives Cold Steel® is currently manufacturing in AUS 10A Stainless steel are the Triple Action™ Folding Knives.

## SAN MAI III®

San Mai means "three layers". It is the term given to the traditional laminated blades used by the Japanese for swords and daggers. Laminated construction is important because it allows different grades of steel to be combined in a single blade. A simple way to think of this type of construction is to imagine a sandwich: The meat center is hard, high carbon steel and the pieces of bread on either side are the lower-carbon, tough side panels. The edge of the blade should be hard to maximize edge holding ability, but if the entire blade was hard it could be damaged during the rigors of battle. For ultimate toughness the body of the blade must be able to withstand impact and lateral stresses. Toughness is generally associated with "softness" and "flexibility" in steel, so that, surprisingly, if a blade is made "tough" the edge will not be hard enough to offer superior edge holding. San Mai III® provides a superior blade with hard (higher carbon) steel in the middle for a keen, long lasting edge and tougher (lower-carbon) steel along the sides for flexibility. This laminate is 25% stronger than our incredibly tough AUS 8A Stainless.

## 420 SUB ZERO QUENCH

Cold Steel® has always sub zero quenched the blades that we have manufactured in Japan, and we are now adding this often omitted, yet crucial, process to the heat treating sequence of the new blades we are making in Taiwan.

Typically, stainless steel blades suffer from retained austenite after they have been heated to critical temperature and then air or gas cooled. The big drawback of this procedure is that it doesn't get the blades cold enough to assure complete transformation from an austenite to martensite grain structure. Only by freezing—sub zero quenching—stainless blades to 120 degrees below zero (Fahrenheit), will the austenite be completely transformed to martensite. This, in turn, assures the blade will be as hard, strong, and wear resistant as it can possibly be.

## 5150

5150 is a medium carbon, low alloy steel that is particularly well suited to the hot forging process. This steel has the properties to harden well, making it ideal for heat treating blades that have a very thick cross section such as tomahawks, axes, etc. After the quenching process, blades will be completely hardened at Rc 55-60. The combination of carbon and alloy elements also produces an extremely tough and impact resistant steel in the hardened and tempered condition which is essential in a tool which is hafted and or thrown.

# STEEL & HEAT TREATMENT

We are vitally interested in all the elements that are critical to overall performance. To back up our claims, we subject our knives to the most strenuous series of tests imaginable. These tests can be seen in the Cold Steel® documentary video, **PROOF**.

**A.)** Our Folding knives are tested (and have been proven) to withstand more weight pressure on their locks than 99% of our competitor's like models.

**B.)** The XL Voyager plowing through 2" of free hanging Manila rope. Manila rope is very tough on a knife edge. Blades that can repeatedly cut this rope will last indefinitely under normal field use.

**C.)** Shaving is a quick indicator of sharpness. Most factory and custom knives do not exhibit this sharpness when first used. All Cold Steel® knives are shaving sharp, right out of the box!

**D.)** Critics say that practically any knife can be stabbed through a car door... but, unlike other knives, our Gunsite™ folder's reinforced Tanto point is remarkably unaffected by the ordeal.

**E.)** Retaining an edge while repeatedly cutting pine wood indicates superior fine edge retention. We maximize this potential in our knives.

**F.)** A Carbon V® Trail Master® Bowie under extreme pressure at about 23° in a vise. This blade returned to true after over one hour in this position. Most knives shatter or permanently bend well before they reach this point.

Most of the tests shown on these pages and in our PROOF video are dangerous and should not be duplicated. ANY knife can be broken or damaged if subjected to sufficient abuse. ALL knives eventually wear out and must be replaced. These destructive tests constitute gross abuse of a knife. Duplicating them will void your warranty.

## WARRANTY

**WE STAND BEHIND OUR KNIVES 100%. WE SUBJECT THEM TO THE HIGHEST STANDARDS IN THE INDUSTRY AND STRIVE TO MAKE EACH ONE AS PERFECT AS POSSIBLE. OUR FIXED BLADE SHEATH KNIVES HAVE A FIVE YEAR WARRANTY TO THE ORIGINAL OWNER AGAINST DEFECTS IN MATERIALS OR WORKMANSHIP. OUR FOLDING KNIVES ARE WARRANTED FOR ONE YEAR.**

# TESTING

Reminiscent of a 1950's styled "James Dean" switchblade, our Ti-Lite™ tactical folder, echoes the swift lines of a memorable classic.

Legal to carry almost everywhere, the AUS 8A Stainless steel blade features a razor sharp edge and a sturdy, needle sharp point. The handle, made of forged Titanium, has been CNC milled for a dashing look, and for maximum strength and safety, we have equipped our Ti-Lite™ with a full length Titanium leaf spring lock (proven, in our tests, to hold 100 lbs).

For ease of carry, the Ti-Lite™ comes equipped with a small, unobtrusive steel pocket clip.

Our thanks go to custom knife maker Phil Boguszewski for his design influence in the creation of the Ti-Lite.™

Specifications:

Blade:	4"	Overall:	8 3/4"
Thick:	1/8" (3mm)	Weight:	4.6 oz.
Steel: AUS 8A Stainless blade with Titanium handle.			

Packing an awesome punch, Cold Steel®'s Triple Action™ folding knives prove that formidable power and strength in a folding knife do not require the weight of an anvil. With a convenient pocket clip, and a closed length of only 5 inches, the 3.5 ounce Triple Action™ folders are a dynamite innovation.

Cold Steel® is the first to offer a high quality folder featuring *AUS10A Stainless Steel* providing superb cutting ability with the finest combination of strength and flexibility.

The aircraft grade aluminum handle is roll engraved with a distinctive pattern, giving the Triple Action™ an exceptional finished look.

Specifications:

	TANTO POINT	DOUBLE EDGE

Triple Action™ Tanto Serrated. (#24TAT) Also available with a plain edge. (#24TATP)

Triple Action™ Double Edge (#24TAD)

FOLDERS

First popularized by the Balisong company in the early 1980's, the Butterfly knife with its revolving handles and super strong lock took the entire nation by storm.

There has been, however, one catch. Since the early 1990's, United States Customs has forbidden the importation of all Butterfly knives under (what can only be assumed to be) their arbitrary interpretation of the Switch Blade Act. This policy has, in turn, severely curtailed the available market supply of these awesome tactical folders.

For years now, Cold Steel® has sat back, silently chaffing under this situation's utter unreasonableness, made all the more dire since we know full well that there are lots of fans of the Butterfly knife out there. Ultimately, there arose the necessity to do something to remedy the dismal state of things as they were, and so we created our own Butterfly knives.

Our Arc-Angel™ Butterfly knives are precision made right here in the USA and display the finest craftsmanship. The blades are flat ground out of our famous Carbon V® steel and honed to a razor edge for real cutting power.

The skeletonized handles are CNC machined out of solid Titanium billets (not cast, like cheap knives) for maximum strength without unnecessary weight or bulkiness. Each knife is hand polished and assembled by skilled technicians for flawless opening and closing action that will both delight and amaze you.

Finally to increase the portability of your Arc-Angel™ we have integrated a state of the art pocket clip so you can carry it discretely wherever you go.

Specifications:

	CLIP POINT	SPEAR POINT
Blade:	4 1/4"	4 1/4"
Overall:	9 11/16"	9 11/16"
Thick:	1/8"	1/8"
Weight:	4.3 oz.	4.2 oz.
Titanium handles with Carbon V® blades.		

ARC-ANGEL™

Arc-Angel™ Clip Point Blade (#96BSC)

Arc-Angel™ Spear Point Blade (#96BSS)

FOLDERS

Our Recon 1 tactical folders are sure to set a new standard that will be hard to beat, because they are as tough as nails and cut like a chain saw! Every facet of their construction has been over engineered to make them as strong, durable and effective as possible. The blades are made out of our proven AUS 8A stainless steel and the handles are thick Zytel®, massively reinforced by heat treated steel liners and five locking bolts. To compliment their super tough blades and handles, they each feature our revolutionary Ultra Lock™ (patent pending) which practically precludes lock failure.

To compliment their tactical mission we have given each blade a tough black Teflon® finish. Our testing has shown this coating or finish offers three major advantages for use on tactical blades. The first is; it is highly resistant to scratches and abrasions while keeping rust at bay. The second is; it eliminates glare and light reflections which may give its user away. The third is; it's a superior lubricant which causes the blade to slip through even tough material with markedly less friction. This means you can cut deeper and far longer than with a non Teflon® coated blade.

To make the Recon 1 as easy to carry as possible, we have equipped each knife with a small, extra strong pocket clip. This clip is completely ambidextrous and its diminutive size doesn't abrade and irritate the palm under protracted use like a larger clip would.

**ULTRA LOCK®** AS THE KNIFE IS OPENED, THE BLADE ROTATES AROUND THE LOCKING PIN VIA A LARGER CUT CHANNEL IN THE BLADE TANG. PRIOR TO REACHING THE FULLY OPENED POSITION, THE SPRING LOADED LOCKING PIN MOVES FORWARD THROUGH THE ONCOMING STRAIGHT PORTION OF THE TANG CHANNEL UNTIL IT "DEAD ENDS". AT THIS POINT THE BLADE IS RIGIDLY LOCKED OPEN AND CAN'T BUDGE AS THE LOCKING PIN IS SURROUNDED BY SOLID STEEL WHICH PREVENTS ANY MOVEMENT OF THE BLADE. IN FACT, THIS LOCKUP IS SO STRONG IT CAN ONLY BE OVERCOME IN TWO MANNERS. THE FIRST IS TO APPLY SO MUCH FORCE TO THE BLADE THAT THE LOCKING PIN SHEARS OFF OR BREAKS THROUGH THE SOLID STEEL BLADE TANG. THE SECOND IS TO MANUALLY RETRACT THE LOCKING PIN FAR ENOUGH THAT IT ESCAPES THE STRAIGHT PART OF THE CHANNEL.

Specifications:	Clip Pt.	Tanto Pt.	Spear Pt.
Blade:	4"	4"	4"

## FOLDERS

Our craftsmen have captured the timeless quality of superior cutlery and united it with the finest in modern materials. The result is a dazzling, high impact leaf-spring folder like no other available.

The Scimitar™ blade is hollow ground and honed to razor sharpness. It has been designed to facilitate the most effective cutting stroke known to man, the draw cut.

Superior engineering combines traditional appeal with the latest Western technology in the contoured Zytel® and steel frame handle. The pistol grip handle allows a forward, reverse, or palm reinforced grip while finger grooves, deep checkering, a pocket clip, and a hard-hitting pommel contribute to its ease of carry and rock steady grip.

Specifications:			
Blade:	4"	Overall:	9"
		Thick:	9/64" (3.5mm)
Weight:	4.3 oz.	Steel:	AUS 8A

Plain Edged Scimitar (#25S)

Our distinctive Nogales™ Clip Point blades are ideal for shearing through thick, fibrous materials like manila rope, cable, hose, and belts. They feature double thumb studs for ambidextrous, lightning fast opening, and jimping on the blade spine to provide the thumb with extra purchase and control. Plus, they have lightweight Zytel® handles with stainless clips, making it easy to keep your Nogales™ folder nearby at all times.

These blades are precision flat ground to form a long shallow "V" shaped cross section, and the edges form a sinuous double curve. This means that whatever material is struck with the inward curving portion of the edge (nearest the hand) will force the remaining outward curved edge entirely through.

The Nogales™ Series folders are available in a range of sizes from the compact El Lobo™ to the awesome cutting power of the Vaquero® Grande.

Specifications:	Vaquero® Grande	El Vaquero®	El Hombre™	El Lobo™

Vaquero™ Grande (#21GNSC)

El Hombre™ (#22EHL)

El Vaquero™ (#21INSC)

## FOLDERS

Due to their light weight and convenience, Zytel® handled lockbacks have gained enormous popularity over heavier, traditional lockbacks with their metal bolsters and wooden scale handles. Our Voyager® Series is the latest generation of these ultra-light knives and they are sure to be the standard by which others are judged for years to come!

The newly redesigned Voyagers® are made from the same premium stainless steel that goes into our famous Tanto. They feature precision milled and hand fitted parts with extra stiff springs. This provides a lock that is safer and stronger than most traditional folders. The blades are extremely wide and ground thin at the edge for tremendous shearing potential. This thin edge allows us to hone the blade to astounding sharpness. Plus, the cutting surface is continuously curved along its entire length for the most efficient possible slicing action. Because of the high carbon content in the stainless steel, you'll find that the sharpness really lasts a surprisingly long time.

If you like serrations, you'll really appreciate our exclusive pattern. It offers the aggressive ripping action of serrated teeth, but with a twist. Our design features groups of very small teeth separated by wide, shallow arcs. This results in the benefits of both a plain and a serrated edge, so that the knife still cuts smoothly through almost any material.

The Voyager® Series offers all the advantages of the latest in lockback construction technology including lightning-quick one-handed opening, light weight and strength, yet without the necessity for unsightly humps or holes in the blade. The result is an appealing look with very modern styling. Every detail has been designed for maximum performance from the reinforced pivot pin and stainless steel pocket clip, to the grooved thumb shelf on the back of the knife for extra traction. Each handle in the newly redesigned Voyager® Series is now more oval shaped in cross-section. Technically, the handle is a full 20 percent thicker, increasing strength and stiffness. Yet, the handle doesn't feel or appear thicker due to the improved contoured design.

As tools, these lightweight, super sharp knives are appropriate in almost any environment from hunting and camping, to hiking and general utility chores. They can also readily fill specialty functions such as a boat or river knife, a chute knife or demanding police/survival/rescue applications.

## TUFF-LITE™

Tough enough to do the job and light enough to be handy, the Cold Steel® Tuff-Lite's™ are there when you need them. They come complete with a lanyard hook so they easily attach to any keychain, belt loop, zipper pull, or neck lanyard.

Quality counts, even in smaller packages, so we made the Tuff-Lite™ Voyagers® with reinforced pivot pins and lockwork that is capable of holding more than 40 pounds! The Tuff-Lites™ are flat and light enough to be carried all day with virtually no effort, even in the pockets of tropical weight pants.

## GUNSITE™

Cold Steel® is right on target with the Gunsite™ Folders — the first authorized and officially endorsed knives of the Gunsite™ Training Center.

The Tanto style blades feature a half-serrated edge, jimping on the spine for a steady grip, and each is ground with a false edge on top. Nothing compares to the fit and finish of the Gunsite™ Folders, with precision parts milled and hand fitted to virtually custom quality.

## X2 VOYAGERS®

The big wide blade of our new X2 Voyager® will cut through most materials like a chain saw and may prove a real life saver when going in harm's way or responding to emergency/rescue situations.

\*The Tuff-Lites™ come with a keychain lanyard hook.

# FOLDERS

Made for the professional hunter, guide, or outfitter but sure to be appreciated by sportsmen everywhere the Pro Lites™ can do it all. If you're skinning muskrat, moose, or are just cleaning a catfish for supper, one of our blades is sure to be right for the job.

Available in clip point or drop point configurations, both blades are big and wide with plenty of belly and ground thin at the edge so they will sheer deep and cut cleanly into anything. The tough, 440A Sub Zero Quench blades are honed to hair shaving sharpness for an edge that will stand up to skin or scale.

Bullet proof handles were the only choice for knives like the Pro Lites™ so we made ours out of Zytel®. They're injection molded in two parts then reinforced with stainless steel liners and locked together by five bolts. They are lightweight and tough beyond belief.

To protect your fingers from their super keen edges, the blades are rigidly locked in place with our strong leaf spring lock. This locking mechanism has been extensively tested and will reliably hold 100 lbs. without catastrophic failure making it the equal of any lock in the world when it comes to safety.

We know that your Pro Lite™ wouldn't be very useful if you couldn't keep it handy or open it quickly in an emergency. That's why we have equipped the blade with a thumb hole for easy, ambidextrous, one handed opening and the handle with a strong pocket clip.

**Specifications:** Clip and Drop Pt.

Weight:	5 oz.	Plain Edge Drop Pt. Model (#57LD)	
Thick:	1/8" (3mm)		
Blade:	4"	Plain Edge Clip Pt. Model (#57LC)	
Overall:	9 1/8"		

Quality and performance. These are the words we used to measure our new Night Force™ folding knife! It offers everything you could want in a tactical folder and we're confident you can bet your survival on it.

Its Bowie style blade is extra wide and features a false edge that terminates in a sharp point. This configuration has proven to ideal for a performance knife as it will pierce or shear through just about any target medium like it was going through butter. The blade has a black Teflon® finish to minimize light reflection and minimize rust and, like other Cold Steel® knives, it is honed to razor sharpness so it will bite deep with the lightest stroke.

Equal attention to detail has been paid to the Zytel® handle of our Night Force.™ It is injection molded in two parts. These parts, or halves, are then reinforced by a stainless steel liner and then bolted together. The result is a stiff, rigid handle that is extremely lightweight yet practically unbreakable.

The Night Force™ folders feature a leafspring lock of our own design. Extensive in-house testing has proved this lock will reliably hold 100 lbs. or more without catastrophic failure and we are confident it will rival any other lock mechanism on the market in terms of safety.

Finally, to keep your Night Force™ folder handy and ready to use at a moment's notice, there are thumb studs on both sides of the blade for one handed opening, and an unobtrusive pocket clip on the right side of the handle.

# TRAIL GUIDE™

Whether you work or play outdoors, you're sure to approve of our Trail Guide™ folders. They are built to be as tough and as rugged as the great outback country, with broad, extra sturdy blades made from our exclusive Carbon V® Steel.

To maximize cutting power, we have flat ground each blade to a shallow "V" cross section and honed it razor sharp so it will shear through an apple or skin a deer with equal ease.

The Trail Guide™ handle was designed for hard use. It's virtually unbreakable and impervious to the weather! It's made of a glass impregnated Nylon called Valox™, and checkered for a non-slip firm grip.

To make them extra handy to carry and easy to open in an emergency, we have equipped our Trail Guides™ with a custom designed pocket clip and given them an ambidextrous thumb hole in the blade.

# FOLDERS

To put it simply, considering product versus price, Cold Steel's® All Terrain Hunter is one of the best knife values on the market today. At home in the outdoors, this addition to our line weighs only 4.4 ounces and can be carried anywhere with confidence.

The All Terrain Hunter's 4 1/2-inch Carbon V® steel blade is honed to razor sharpness and black epoxy powder coated for added protection from the elements. Its shockabsorbing Kraton® handle is finger grooved and checkered for a sure grip, and a lanyard hole facilitates easy access. The self-draining sheath is of hard polycarbonate with an integral belt loop.

Specifications:	
Weight:	4.4 oz.

Handle:	5" Kraton®
Overall:	9 1/2"
Steel:	Carbon V® with black epoxy powder coat.

Black Polycarbonate sheath.

**CLASSIC STOCKMAN:** The Stockman style pocket knife first emerged on the cutlery scene in the 1890's and appears to have evolved from the popular cattle knife of the western plains. Ours are presented in two sizes; we call them the Classic Stockman and the Classic Junior Stockman.

Each comes with a clip point, sheepsfoot and spey blade in our exclusive Carbon V® steel.

**CLASSIC TRAPPER:** Whether you're a hunter, trapper, or all around outdoorsman, you're sure to appreciate our new Classic Trapper. It is built on a four inch swell center jack knife die and boasts two big working blades. The master blade features a long clip point, useful for sticking and general utility work. The second blade is an equally long spey blade used for skinning. Both blades are flat ground from Carbon V® steel and expertly tempered for an edge that really lasts.

Specifications:	Junior Stockman	Stockman	Trapper

# HUNTING/OUTDOORS

Our president, Lynn Thompson, bought the first knife custom maker, Lloyd Pendleton ever made in 1973. Now these friends have collaborated to produce two of Lloyd's most popular knives, we call them the Pendleton Hunter and the Pendleton Mini Hunter.

In fabricating these knives, we have tried to duplicate Lloyd's work as accurately as possible. Both blades are hollow ground and honed to perfection and the handle's cross sections and contours match Lloyd's handmade knives exactly. For safety and durability, we have dispensed with leather in favor of Secure-Ex™ for the sheaths. This material won't rot or mildew and is far more resistant to cuts or punctures than leather.

Sheaths

The new standard for an American-made hunting knife, the Master Hunter and Master Hunter Plus employ a broad blade which is flat ground extra thin with a distinct distal taper for unprecedented cutting ability, edge retention and ease of re-sharpening. The Master Hunter is available in AUS 8A stainless and Carbon V® steel, while the Master Hunter Plus, complete with guthook, is available in Carbon V®. The comfortable, deeply checkered Kraton® grip encourages long use without fatigue. The Master Hunter has been extensively field tested in Africa, Australia, Alaska and Colorado and has won the praise of many of the world's finest hunters.

Now you can filet a fish with a keen blade that lies flat against the backbone and cuts just as if it were going through butter.

Honed from 3/32" thick Carbon V® steel, our Filet knives are stronger and tougher than the competition's and they hold their sharp edges longer than any stainless blade.

The key to the Filet Knife's cutting power is an approximately 20% wider blade than most of our competitors. This allows for a long, shallow "V" cross section, a wider grind, and a thinner edge which makes for a sharper knife.

Specifications:			
	Blade	Overall	Weight

The Bird & Trout Knife is a modern version of a 100-year old classic, treasured by hunters and fishermen for generations. Its enduring popularity is enhanced by its ultra slim profile, and unique all steel construction.

The skeletonized handle offers great versatility and freedom of movement. It's perfect for working in tight places or making precise cuts. The ring allows the knife to hang from the little finger when not in use and yet remain instantly available.

For safety and handiness, each knife comes with a Concealex® neck sheath and a steel bead chain lanyard.

Specifications:			
Weight:	0.8oz	Thick:	7/64" (2.6mm)
Handle:	4 1/16"	Steel:	AUS 6A

Bird & Trout Knife  
(#20BTJ)

In recent years, we had received a staggering number of requests from some of our more nostalgic customers and friends alike to put the Outdoorsman, a Cold Steel® favorite that dates back to the mid 1980's, into production again.

It took a while, but eventually we located and dusted off the tooling and proceeded to produce a brand new run.

Not willing to sit on our laurels, this time we have added two new improvements. The first improvement is a row of jimping on the blade back. This gives the thumb and index finger more control of the edge because they now have a non-slip platform to rest on. Secondly, we've added a chopping edge, or bone breaker. In our tests, this edge hacked through everything we put in front of it, including heavy gauge steel wire, so it's a sure bet it'll stand up in the field! As it did before, the Outdoorsman comes with a heavy leather sheath, fitted with a brush proof retaining strap.

Specifications:			
Weight:	9.9oz	Thick:	3/16"
Blade:	6"	Handle:	5"
Steel:	AUS 8A	Overall:	11"
Checkeded Kraton® handle.

## TRAIL MASTER®

*In Carbon V®:* Without a doubt, the most knife for the money ever built. In terms of sharpness, edge holding, strength and sheer cutting power, it will outperform any factory made knife we know of and 99% of all hand forged knives as well. You can see the evidence for yourself in our PROOF video.

*In San Mai III® Stainless:* If you want a Bowie that requires minimum maintenance and is practically immune to water, salt, or the humidity of a jungle environment, then this is the Trail Master® for you! It comes with a rolled edge, capable of severing 4" or more of free hanging manila rope!

## LAREDO BOWIE

Big, broad and beautiful are the only three words necessary to describe our new Laredo Bowie. Its long, thick blade of Carbon V® steel is flat ground and features a curved cutting edge that terminates in a dagger sharp point. For maximum versatility as a weapon it also sports a 4 1/2" long fully sharpened false edge to facilitate the deadly back cut as well as forehand blows.

The exotic hardwood handle of our Laredo Bowie, in the classic coffin shape, is contoured to fit the hand snugly and provides a positive grip when cutting, chopping or thrusting. To compliment the awesome blade and beautifully crafted handle we have added a highly functional guard and bolster made of mirror polished brass. The whole package comes housed in a traditional styled brown scabbard made of thick, heavy leather.

The Greek Kopis and The Roman Machaira were both possible inspirations for the Kukri. These ancient, forward curved blades were known for their tremendous chopping cuts. And now, Cold Steel® takes great pride in being able to offer our versions of these historic blades.

All of our Kukris feature a Carbon V® blade with a baked on, black Epoxy Coated finish to protect against rust, and deeply checkered Kraton® handles for a firm, non-slip grip.

### LTC KUKRI

The curve of our LTC Kukri's blade is very important because no matter what part of the blade makes contact with a target, the edge is always presented at an angle. This creates a shearing motion, so that the edge slices through the target as the weight of the blade drives it deeper. With its thin cross section it will easily cut wood, brush or other soft objects.

### GURKHA KUKRI

Taking advantage of its downward curving blade and long, "V" shaped cross section, the Gurkha Kukri places its edge at an angle to a target, creating a powerful shearing effect.

The heaviest Kukri on the market, the blade is almost an inch wider near the tip than it is at the handle, which shifts the knife's balance point forward. This makes it possible for a substantial blow to be struck with minimal effort, using inertia alone to complete the cut.

### GURKHA LIGHT

For those who prefer a lighter Kukri, we offer our Gurkha Light. At just under sixteen ounces and sporting a 1/8" thick saber ground blade, it is a lighter rendition of our own Gurkha Kukri.

### MINI GURKHA LIGHT

Perhaps the most versatile of our Kukri Series, the Mini Gurkha Light is an incredible combination of strength and utility. Its distinctively curved blade gives it the chopping power of its larger siblings, yet it weighs only 13.9 ounces!

Specifications:				
	Mini Gurkha Light Kukri	Gurkha Kukri	Gurkha Light Kukri	LTC Kukri

ASSOCIATION

The Gurkha Kukris are officially endorsed by the American Bando Association. They are marked with the association's distinctive symbol.

ALL TERRAIN

Original SOG™ knives from the Vietnam era are extremely rare and replicas can be very costly. To remedy this situation, we have used modern materials and construction methods to make our own more reasonably priced version.

We call our SOG™ style knife the UWK™ and it follows the profile of the original very closely. The only changes made were to bead blast the blade and to utilize an integral Kraton® handle and guard.

The ODA™ is designed to be a less expensive version of our own Military Classic (see page 18). Instead of a highly polished blade finish that is seen on the Military Classic, the ODA™ features a bead blasted finish and an integral Kraton® guard/handle, substituting for the Military Classic's Micarta grip and stainless guard. The deeply checkered Kraton® handle on our ODA offers an even better grip than the Micarta does and it is equally durable.

The OSS™ sub-hilt fighter offers all the advantages and performance of a custom knife at a fraction of the price. The double edged blade is sub zero quenched for strength and edge retention and comes razor sharp. For the ultimate grip the handle, guard, and sub-hilt are injection molded in one integral piece of Kraton®. This saves unnecessary costs while delivering the durability, security, and control the sub-hilt is famous for.

Specifications:	UWK™	ODA™	OSS™
Blade:	6 1/2"	7"	8 1/4"
Overall:	11 3/8"	11 3/4"	13 3/8"
Weight:	7.1 oz.	7.9 oz.	8.2 oz.
All: 3/16" thick 420 Sub Zero Quench Stainless steel.			
Secure-Ex™ sheaths with an adjustable Cordura belt loop.

ODA™

OSS™

TACTICAL

In most respects the Recon Scout® is simply a 7 1/2" Trail Master® (see page 15). It has the same steel, heat treatment, blade thickness, and blade shape. Like the Trail Master®, it features a rich, baked-on black epoxy finish that helps to control rust, minimize light reflection and deliver years of rugged service. The blade is flat ground for maximum shearing power and the razor sharp edge is continuously curved along its entire length. This curve allows the blade to be used in a variety of cutting and chopping strokes. Plus, the extra curve near the tip provides plenty of “belly” for emergency field dressing. It is perhaps the world’s finest combat knife.

**Specifications:**

Blade:	7 1/2"	Handle:	5" Kraton®
Overall:	12 1/2"	Thickness:	5/16"
Steel:	Carbon V®	Weight:	1.5 oz.

## R1 MILITARY CLASSIC

This classic World War II design has seen action in every major conflict around the globe, including Korea, Vietnam, Central America and more recently, in the Persian Gulf.

Our R1 Military Classic is an exact replica of the original and offers unbelievable performance for less than half of the original price. Each knife is made to the most exacting Cold Steel® standards and represents quality you can bet your life on!

## BLACK BEAR CLASSIC

First developed by Bob Loveless, one of the founding members of the Knifemaker’s Guild, the Black Bear Classic is perhaps the quintessential combat knife. Its 8" blade offers excellent reach, and the sub hilt practically eliminates the possibility of the hand being dislodged or coming into contact with the blade.

**Specifications:**

Survival/Rescue operations demand a versatile knife able to withstand the most extreme abuse. The SRK® (Survival Rescue Knife) was designed with this in mind. No expense was spared in steel, heat treatment, and construction. The blade is finished with a rich black epoxy powder coat which helps to protect the Carbon V® steel from the elements. At 3/16 of an inch thick, the SRK® offers the sturdiest possible point and edge configuration, without sacrificing sharpness.

The SRK®’s handle sports a single quillion finger guard and a deeply checkered Kraton® grip.

**Specifications:**

## MINI CULLODEN™

## THE SPIKE™

## KOBUN™

Named after the last heroic battle of the Scottish nation on April 16, 1746, the Mini Culloden™ is an alternative to the traditional double edged boot knife. Available with either a plain or serrated edge, the Mini Culloden™ conjures memories of the kilt-clad highland warriors of old.

The super tough Kraton® handle is checkered for unsurpassed grip comfort, while the 3 1/2-inch AUS 8A Stainless steel blade offers superior edge holding ability.

The Mini Culloden™ is lean and efficient, well worthy of its commemorative namesake.

### Specifications:

Blade:	3 1/2"	Handle:	3 1/2"
Thick:	1/8" (3mm)	Weight:	2.3oz.

Concealex™  
neck sheath.

The Spike,™ designed by Barry Dawson, is a weapon pared down to its bare essentials. Its thick, narrow blade is distal tapered and flat ground to a zero edge. This creates a unique cross section that facilitates both penetration of the tip and cutting power previously unknown in such a thick, narrow blade. The integral handle of The Spike™ compliments its minimalist theme. It has been carefully shaped out of solid steel, wrapped with cord and had all of its sharp edges “melted” so they don’t irritate the hand. Each spike comes with a sturdy Secure-Ex™ sheath that includes a steel bead lanyard so you can wear it around your neck or lash it to a “D” ring, fanny pack, or other gear.

### Specifications:

Blade:	4"	Handle:	4"	Thick:	7/32"
Weight:	Spike: 2.5 oz.	Spike Tanto:	2.6 oz.		

Steel: 420 Sub Zero Quench

Sheath:  
Secure-Ex™

Available in both bead blasted 420 Sub Zero Quench Stainless or black Epoxy Powder Coated Carbon V® steel, the Kobun™ blade won’t let you down like other boot knives which are notorious for paper thin, easily bent or broken points. The full thickness of the blade’s spine runs almost to its very tip for added strength.

The Kraton® handle, with its thin cross section and contours, is designed to offer minimum bulk and maximum grip. It is deeply checkered to resist turning or shifting in the hand.

### Specifications:

Blade:	5 1/2"	Handle:	4 3/8"	Thick:	1/8"
Weight:	4.5 oz. (Carbon V®)	4.4 oz. (420 Sub Zero Quench)

boot/belt.

This push knife design was first made popular in the U.S. during the 1849 Gold Rush in California. It was highly successful because it creatively combined compact size, pronounced efficiency, and unparalleled grip in a single knife.

Now Cold Steel® is happy to present the finest production push knives in almost 150 years.

Designed for the 21st century, these knives are becoming popular with military personnel around the world because, unlike a revolver or automatic pistol, they never break, malfunction, or run out of ammunition. What’s more, they offer “big knife” capabilities in a compact package (2" shorter overall than most boot knives) that can be easily attached to tactical web gear, tucked in a waistband or boot top, or strapped to a wrist or ankle.

The Desperado of the mythic “West”...

He was an outlaw. He was an individual with nothing left to lose, and an astonishing reputation to be gained. With some formidable skills with a gun and a knife, he became one fierce opponent, worthy of respect and often, widely feared.

Cold Steel® offers a knife which lives up to that reputation with our versatile Desperado!™

The Desperado™ features a serrated, 5" Nogales™ clip point blade and an innovative egg shaped Kraton® handle. It combines the performance sensibilities of a push dagger with the versatility of a conventional boot knife.

Special attention was paid to the knife point. Designed to be sharp, yet thick enough to withstand hard impact and even light prying, the Desperado's™ point has strong advantages over other blades that have less pronounced curves.

Tai Pan™ (#13D)

Imperial Tai Pan™ (#13DDC)  
The Imperial Tai Pan™ is individually serial numbered 001-500 and comes complete with a certificate of authenticity.

Oyabun (#19BT)

**Tai Pan:**™ Embodies the best features of a classic dagger while minimizing its shortcomings. Most daggers are notorious for thin, easily broken points. In contrast, the Tai Pan™ features a sturdy spear point which is wide and thick enough to resist breaking.

As with the Tanto, the Tai Pan™ has a tapered, black Kraton® handle with a unique flattened oval cross section. This material and handle shape is ideal for preventing the knife from shifting or turning in the hand even under the worst circumstances.

**Imperial Tai Pan:**™ Shares many of the attributes of our regular version, yet differs markedly in its aesthetic styling. In the traditional Japanese way, the Imperial Tai Pan™ features a braided, cord wrapped handle in the centuries-old “cross over” pattern, with a unique underlying base of “Same” or ray skin.

The razor sharp blade is 161-layer San Mai Damascus steel. This rare steel consists of two 80 layer sections laminated around a hard stainless core. The end result is a visually breathtaking and virtually unbreakable blade.

Specifications:	Tai Pan™	Imperial Tai Pan™
Blade:	7 1/2"	7 1/2"
Overall:	13"	13"
Thick:	3/16"	3/16"
Weight:	10.8 oz.	9.4oz.

# TAI PAN™

# OYABUN™

Exhibiting an unequalled level of craftsmanship, the knives in the Tanto Series feature a lustrous satin finish on the hollow ground blade bevels and a line grain finish on the flat spine. These two finishes characterize our state of the art grinding technique and accentuate the Cold Steel® Tanto’s unique appearance.

**Tanto:** The knife that started the Cold Steel® legend. It features a stainless steel guard and pommel and a virtually indestructible 6" blade.

**Master Tanto:** Comparable to the original, except that its blade is San Mai III,® making it approximately 25% stronger.

**Magnum Tanto II:** Just two ounces heavier than the Tanto, the Magnum Tanto II provides a full 30% increase in cutting power. Combine that with the visual impact of a suba-style (sword) guard and you have perhaps the ideal Tanto. The Magnum Tanto II features a San Mai III® blade.

**Magnum Tanto IX & XII:** These knives were created in response to popular demand for a longer Tanto. They are available with 9" or 12" blade lengths, and both feature our exclusive San Mai III® laminated steel.

Specifications:	Regular Tanto	Master Tanto	Magnum Tanto II	Magnum Tanto IX	Magnum Tanto XII

# JAPANESE

Our factory has used only traditional materials for our Japanese swords' fittings. The Tsuba (guard), Fuchi (collar), and Kashira (pommel) are expertly made and finely crafted from black iron.

The Habaki (blade collar) is handmade out of polished brass and each hilt is covered in Samé (ray skin) and tightly wrapped in the traditional "cross-over" style with black cord.

All feature AUS 1050 spring tempered blades. The largest sword has the capability of easily severing a seven inch thick stalk of bamboo with a single stroke!

The reproduction scabbard is made of high quality leather, brass & copper.		

## 1917 CUTLASS & 1917 SABER

This medium weight saber was widely used by Napoleon's cavalry and even saw use on both sides during our own Civil War. In appearance, it closely resembles the U.S.1860 Light CavalrySaber, but in actuality is a far more effective and durable weapon. The thick, moderately curved blade is forged out of 1050 Carbon Steel and features a long wide fuller (or blood groove) and a sharp, useful point. The grip is equally well made, being wrapped in black leather and strongly protected by a stout, brass 3 bar hilt.

Specifications:	
Overall:	39"
Blade:	33 <sup>3</sup> / <sub>4</sub> "
Thick:	5 <sup>5</sup> / <sub>16</sub> "
Weight:	37.7oz.
Steel:	1050 Carbon
Comes with a heavy-duty polished steel scabbard.	

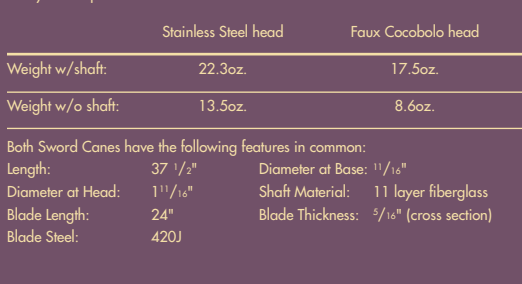

## 1830 NAPOLEON SABER

We have been intrigued with the potential of sword canes ever since Major Morris Wright used one to grievously injure Jim Bowie in their famous fight on the Vidalia Sand Bar so many years ago. You see, there is no denying that a sword cane is an uncommonly handy weapon that can be put into action with lightning speed.

The blade on our sword cane is 24" long and has an overall reach of 31" when you include the head and handle. For maximum effectiveness, we have given our sword cane a stiff cruciform (4 sided) cross section and a wickedly sharp point. The scabbard or shaft of our sword cane is made out of eleven layers of laminated fiberglass. It can be swung faster than the speed of sound yet proved unbreakable in our impact tests.

Specifications:		
Our Sword canes are available with either a faux Cocobolo wood head or with a heavy mirror polished stainless steel head.		
	Stainless Steel head	Faux Cocobolo head
Weight w/shaft:	22.3oz.	17.5oz.
Weight w/o shaft:	13.5oz.	8.6oz.
Both Sword Canes have the following features in common:		
Length:	37 1 <sup>1</sup> / <sub>2</sub> "	Diameter at Base: 1 <sup>1</sup> / <sub>16</sub> "
Diameter at Head:	1 1 <sup>1</sup> / <sub>16</sub> "	Shaft Material: 11 layer fiberglass
Blade Length:	24"	Blade Thickness: 5 <sup>5</sup> / <sub>16</sub> " (cross section)
Blade Steel:	420J	

The traditional weapon of the highland clansman, the Scottish Broadsword has sown fear into the hearts of Englishmen for eons.

Our own replica of this famous double edged weapon features hand forged and polished triple fullers. The stout basket hilt is made of blued steel with a black leather handle decoratively wrapped in copper wire. Each broad sword will pass the stringent British Proof Test.

Specifications:	
Overall:	37 <sup>3</sup> / <sub>4</sub> "
Blade:	31 <sup>1</sup> / <sub>2</sub> "
Thick:	7 <sup>7</sup> / <sub>32</sub> "
Weight:	47.8oz.
Steel:	AUS 1050
Wood and leather scabbard, with a blued steel chape and throat	

## SCOTTISH BROADSWORD

The two most admired features of the military issued Shashqa was its moderately curved blade and spear point and its scabbard, designed to house a rifle bayonet.

Our own version of this historic weapon replicates the look and feel of the original. The only change we made was to make the sword a little more versatile by replacing the bayonet with a blued, four sided dagger blade.

Specifications:	
Overall:	38"
Blade:	32"
Thick:	1 <sup>1</sup> / <sub>4</sub> "
Weight:	36.4oz.
Steel:	AUS 1050
Wood/leather scabbard, and blued dagger with a brass handle.	

This saber was widely used by the British and their Prussian allies under General Blucher in the Battle of Waterloo. The blade was derived from the ferocious Indian Talwar and was reviled by the French who protested its use due to the horrible wounds it inflicted. This saber was so successful as a weapon, that the German Cavalry continued to use it right up to the beginning of the 20th century!

Specifications:	
Overall:	37 <sup>3</sup> / <sub>4</sub> "
Blade:	33"
Thick:	5 <sup>5</sup> / <sub>16</sub> "
Weight:	34.2oz.
Steel:	AUS 1050
Available with a steel (88SS) scabbard or a wood & leather scabbard (88S).	

## 1796 LIGHT CAVALRY SABER

The Indian saber or Talwar is one of the most effective cutting weapons known to man. Widely recognized throughout the world by its curved blade, and its distinctive brass hilt and unusual dish pommel.

Our Talwar replicates the traditional lines remarkably well, with a long blade for unparalleled cutting power and some very handsome detail work on the polished brass hilt and dish shaped pommel.

Specifications:	
Overall:	38 <sup>1</sup> / <sub>2</sub> "
Blade:	32 <sup>1</sup> / <sub>2</sub> "
Thick:	5 <sup>5</sup> / <sub>16</sub> "
Weight:	41.8oz.
Steel:	AUS 1050
Wood and leather scabbard, with a brass chape and throat.	

## INDIAN TALWAR

MINI PAL™

The Mini Pal™ delivers heavyweight performance. The edge zips through a host of materials at unbelievable speed. The 1" long blade is razor sharp, to open delicate packages and envelopes, cut rope or punch through heavy cartons. Plus the unique handle offers a variety of grips that would be impossible with any other design. It comes with a Zytel® lanyard sheath.

READY EDGE™

With a grip similar to the Para Edge™, the Ready Edge™ sports a smaller 2" spear point blade. The blade is double hollow ground with our distinctive serrated edge. It comes with a convenient lanyard sheath. Scuba Divers are using it, and it's become a favorite among fishermen in Alaska for cutting nets and heavy line.

Specifications:

	Mini Pal™	Ready Edge¹
Blade:	1"	2"
Handle:	1 5⁄8"	2 3⁄4"
Overall:	2 5⁄8"	4 3⁄4"
Thick:	5⁄64" (2mm)	3⁄32" (2.5 mm)
Weight:	0.5oz.	1.3oz.

400 Series Stainless Steel with Kraton® handles. Zytel® sheath with lanyard hook.

A Concealex™ neck sheath similar to the one that comes with the Para Edge™ is available for the Ready Edge™.

Sheath: (#SK42NS). Sold Separately.

LANYARD

Mini Pal™ (#43NS)

Overall:	3 1⁄8"	4 5⁄16"
Thick:	5⁄64" (2mm)	5⁄64" (2mm)
Weight:	0.7oz.	0.8oz.

420J Steel with Kraton® handles.

Both the Urban Pal™ and Super Edge™ come complete with a tough Secure-Ex™ sheath with key ring

URBAN PAL™

The Urban Pal™ should be standard equipment for survival in today's urban jungle. At less than half an ounce, it's perfectly at home in a pocket or purse and can be easily attached to a key ring, or hung around the neck. With a 1 1⁄2" long blade, it's big enough to get the job done and its unique handle allows you to really put your weight into its point or edge.

SUPER EDGE™

This rugged little workhorse can cut through tough materials that would make a bigger knife "choke". Its diminutive overall length and feather light Secure-Ex™ sheath make it a natural for attachment to a key ring, zipper pull, "D" ring or belt loop. It's so light and comfortable to carry you'll never notice it when it's casually looped around your neck, conveniently laced to your shoe or cunningly pinned inside the crown of your hat.

KEY-RING

KITCHEN SERIES

Flat ground and honed to a superb serrated edge, these blades are a joy to use. They feature a heavily contoured and deeply checkered Kraton® handle with an aggressive non-slip pattern. Now your kitchen duties can be done with the ease of Cold Steel® precision and performance.

Specifications:

Weight:	2.6oz.	2.9oz.

7" Kitchen Knife [right] (#45KL7S)

KITCHEN

PARA EDGE™

Cold Steel's® Para Edge™ neck knives are as light as a feather. They offer fixed blade performance in a pocket knife sized package. Weighing in at a mere 2 ounces including sheath and bead chain lanyard, they can be comfortably worn 24 hours a day. Suspended from the neck outside of clothing, they make a handy utility or rescue knife.

Each Para Edge™ comes with a rugged, high performance AUS 6A Stainless blade ground to a thin, razor sharp edge and safely housed in a tough Concealex™ sheath.

Specifications:

	Blade	Handle	Overall	Thick	Weight
Dbl. Edge:	3"	2 3⁄4"	5 3⁄4"	1⁄8"	1.3 oz.

Tanto Pt.:	3"	2 3⁄4"	5 3⁄4"	1⁄8"	1.4 oz.

AUS 6A with Kraton® handles. Includes Concealex™ neck sheath.

HAI HOCHO™

Our newly updated Hai Hocho™ or "yes knife" (in Japanese) can do it all! It's perfect for cooking, camping, fishing, boating, wherever you need a sharp, handy knife. The secret to its versatility is its thin, wide blade. This blade configuration has proved equally adept at cutting, slicing and slashing and will slice an apple like it was butter. To make it even more useful, the Hai Hocho™ comes with a high tech Secure-Ex™ sheath and steel bead lanyard so you can carry it in your glove box, purse, pack, tackle box, or hang it around your neck where its super light weight will scarcely be noticed.

MINI TAC™

Reliable and ready, Cold Steel's® new Mini Tac™ is setting the standard in neck knife performance.

The Mini Tac™ is light enough to be carried with ease, while placing awesome utility at your fingertips. Its 4-inch drop point tanto blade is fashioned of extra thin and wide AUS 6A Stainless steel for maximum cutting power and control. The flat, thin Kraton® handle is deeply checkered and refuses to roll in your grip. The heavy duty Concealex™ neck sheath is injection molded and holds the knife securely while allowing for a lightning draw.

Specifications:

Our new series of kitchen knives, the Kitchen Classics, will race through just about any task you can imagine. These blades are ice tempered and then precision flat ground for maximum cutting power. All models in the series come with a razor sharp edge that lasts and lasts, and some have serrated edges uniquely appropriate to the tasks they were designed to do.

The handles are, in a word, terrific! Carefully designed to ensure a strong, secure, yet comfortable grip, they feature a stiff Zytel® core on the inside, with a softer, deeply checkered Kraton® exterior for a the kind of non-slip grip that must be felt to be appreciated!

The Kitchen Classics are available for purchase as single items or as a complete set. The set includes an attractive counter-top oak stand, and one of each [except for the Steak Knife, which comes in a group of 6] of the knives shown on the opposite page.

Kitchen Classics Set  
(#59KSET)  
Includes:  
Oak black counter-top stand  
1 Paring Knife  
1 Boning Knife  
1 Utility Knife  
1 Chef's Knife  
1 Slicer  
1 Bread Knife  
6 Steak Knives

Bread Knife:	3.3 oz.	1.5mm (1/16")	9"	13 7/8"
All models have 420 Sub Zero Quench Stainless Steel blades.				

WAR HAMMER

Medieval war strategists developed this highly effective solution to the problem of plate armor, which is impervious to most swords but completely

vulnerable to a weapon like the War Hammer.

Our version features an enormous hammer face (1 1/2" square) and a 3 1/2" spike.

BATTLE AXE

After the club—the axe is man's second oldest weapon. It was used throughout antiquity from Egypt to Rome. The Vikings found it practical and it remained in use through the Renaissance.

Our Battle Axe can be easily wielded with two hands due to its low weight. It features the 30" hickory handle and steel langettes that appear on our War Hammer.

TRAIL HAWK

Modeled after an early frontier pattern, our Trail Hawk can do it all. It's an excellent chopper and has a functional hammer poll with a hardened face so you can drive nails, hammer in stakes, and smash or crush just about anything. It's extremely lightweight and compact so it's a cinch to tuck it under your belt or lash it to a pack or shooting bag.

RIFLEMAN'S HAWK

Reminiscent of some early American designs, the Rifleman's Hawk features the "peace pipe" appearance that was commonly used by Native Americans during the 1800's

The Rifleman's Hawk has a functional hexagonal hammer poll for hammering stakes or nails.

FRONTIER HAWK

The Cold Steel® Frontier Hawk is one of our lightest and smallest tomahawks. Its light weight makes it a functional camp hatchet, causing minimal fatigue to wrist, elbow and shoulder.

NORSE HAWK

The Norse Hawk's 4" blade features a highly curved cutting edge and terminates in two sharp points. These points increase the chance of a stick when the Norse Hawk is thrown.

BATTLE MACE

A descendent of the simple wooden club, the Mace has been in continual use on the world's battlefields from the Bronze Age right up through the First World War. The advantages of the Mace are just about timeless. It's practically unbreakable, never requires maintenance or re-sharpening, and is frightfully effective.

The carbon steel head consists of five sturdy flanges attached to a short seamless tube which is then mounted on a quartersawn ash shaft. The end result is a virtually unbreakable weapon that can be wielded with either one or both hands with absolutely devastating results.

HEAVY METAL TOOLS & WEAPONS

Specifications:				
	Overall Length	Primary Edge	Hawk Length	Weight
Battle Axe:	30"	5 1/4"	6 1/2"	43.5 oz.

MACHETES

The machete has proven to be the ultimate outdoor and survival tool. It will cut, chop, slash, or smash just about anything you can put in front of it.

It can be used to kill both fish and game and will also field dress and prepare them for the table as well. And when you look at its meager cost, it's got to be one of the best bargains for the money. In fact it's so cheap and useful that even the poorest peasant in South America or tribesman in Africa invariably owns one and counts on it as one of his most precious possessions.

These blades are made out of SAE 1055 medium carbon steel and are dipped in a special anti-rust solution before having a black baked on finish. Each machete comes with a good utility edge that will cut right out of the box and, with a little work, can be made hair shaving sharp. The handles of our machetes are made out of polypropylene. They're designed to provide a comfortable secure grip, resist chipping, cracking or breaking, and to last practically forever.

**LIGHT MACHETE**  
PERFECT FOR CUTTING GRASS, WEEDS, VINES, BRUSH, AND BRIARS. HEAVILY USED IN AFRICA FOR HARVESTING CORN AND OTHER CROPS.

**HEAVY MACHETE**  
THE HEAVIEST MACHETE WE MAKE. THE BLADE WIDENS TOWARD THE TIP FOR MAXIMUM CUTTING AND CHOPPING POWER.

**BOLO MACHETE**  
KNOWN THROUGHOUT ASIA AND PACIFIC RIM, THE BOLO MACHETE FEATURES A "FAT" POINT THAT SHIFTS ITS WEIGHT FORWARD WHERE IT CAN DO THE MOST GOOD WHEN HEAVY CHOPPING OR SLASHING IS CALLED FOR. IT'S AN EXCELLENT SURVIVAL TOOL AND WILL OPEN A COCONUT OR CHOP DOWN A TREE WITH EQUAL EASE.

**PANGA MACHETE**  
THE STANDARD MACHETE FOR THE ENTIRE AFRICAN CONTINENT. THIS ONE IS EXCELLENT FOR CUTTING THICK BRUSH AND CHOPPING DOWN SAPLINGS AND SMALL TREES.

SPECIALTY

Unlike most hollow handle survival knives, the Bushman® has no joint or seam between the blade and handle that requires a mechanical fastener. Instead, the Bushman's® blade and integral handle have been expertly cold forged out of a single piece of 2.5mm thick SK-5 high carbon steel. The resulting knife has been expertly heat treated and tempered to RC54 and, when subjected to factory tests, has withstood over two tons of pressure on its blade/handle transition!

The Mini Bushman® is identical to its big brother in every respect, except it's approximately ¾ the size of the original Bushman.® We think its smaller size will make it a natural for stuffing into a rucksack, tackle or tool box, or even your glove compartment. It also makes a great hunting knife as it's guaranteed to be unbreakable and will prove ideal as a first knife for the new outdoorsman in your family.

Specifications:	Blade	Overall	Weight
Bushman®	7"	12 1/4"	10.1oz.
Mini Bushman®	4 3/4"	9 1/8"	7.6 oz.
3/32" Thick, Cold forged SK-5 High Carbon Steel.			

Sheath: Features a hard plastic safety liner.

Our spears make for a unique, and athletic target throwing experience! Like traditional spear heads, ours are heat treated and then drawn to a tough spring temper. This process enables the spear head to flex or bend under impact stresses rather than break.

The Assegai, invented by the legendary Zulu king Shaka in the early 1800's, revolutionized tribal warfare in Southern Africa. Our version is available with your choice of two different shaft lengths, and two different head sizes!

The Boar Spear, is a modern re-creation of a design that dates back to the European Renaissance. It is cold forged out of medium carbon SK-5 Steel and, like our other spears, is heat treated to a spring temper. The Boar Spear comes with an extra stout premium ash shaft.

The Samburu Spear, is based on a design used by the Samburu tribe from Kenya's northern frontier. It is perhaps the most advanced spear of its type on the planet. With this extraordinary spear, warriors routinely dispatch marauding leopards, lions and even firearm toting bandits at unheard of distances.

Specifications:	Assegai	Small Assegai	Boar Spear	Samburu Spear

## SPEARS

The Special Forces Shovel is modeled after the original Soviet Spetsnaz shovel. The Spetsnaz were the Soviet army's most elite unit, and were renowned for their deadly efficiency.

Trained to travel light, the Spetsnaz packed only the bare essentials. One of their favorite tools was their unique shovel which featured a broad flat blade and three sharp edges for maximum versatility.

Our shovel follows the Soviet design as faithfully as possible with newer improvements in the steel (twice as thick) and heat treatment.

Special Forces Shovel (#92SF)

Specifications:	
Overall: 19 <sup>11</sup> / <sub>16</sub> "	Thick: 5/64"
Weight: 26.6oz.	Width: 6"
Medium Carbon Steel with a hardwood handle.	
A leather sheath is available (#SL92SF). Sold separately.	

Like the Special Forces Shovel, the Bad Axe is made of medium carbon steel, over 2mm thick and fully heat treated for strength. The edges of the Bad Axe have been factory honed to a sharp utility edge that can easily be improved to razor sharpness without much effort. The handle is made of premium hardwood and is finished in clear lacquer.

The twin edge design offers double the cutting potential. When one edge begins to dull the other is razor sharp. Plus the axe cuts in either direction.

It has all the necessary weight for serious chopping, and for target throwing, it's a dream come true! With all its points and cutting surfaces, it will stick in virtually any position.

Bad Axe (#92BX)

Specifications:			
Overall:	20"	Thick:	5/64"
Weight:	26oz.	Width:	8 1/8"

## BAD AXE

## SPECIALTY

There are a lot of throwing knives on the market, but all seem to be made out of cheap steel that bends or worse, stainless steel that breaks. That's why Cold Steel® made the True Flight® Thrower.

Our True Flight Thrower beats the competition, hands down. We use our own exclusive Carbon V® Steel for a hard, yet resilient blade that will “bounce-back” from any throw. For versatility, we have given it a utility edge that will stand-up to your toughest chores.

Specifications: True Flight Thrower			
Overall:	10 3/4"	Thick:	3/16"
Weight:	8.5oz.	Steel:	Carbon V®
Finish:	Black Epoxy Powder Coat		
The True Flight Thrower features a paracord wrap on the handle.			

Heavy and perfectly balanced, the Torpedo is a lot of fun for target throwing. The double tapered points slide effortlessly from the hand for a perfect release with twice the sticking potential of a conventional throwing knife. The Torpedo is made from cold rolled 5150 steel, zone heat treated for maximum resistance to breakage.

Specifications: Torpedo			
Overall:	15"	Thick:	1"
Weight:	32oz.	Steel:	5150
Finish:	Black Matte.		

In Africa, the Sjambok (Sham-Bawk) is a cattle prod, a whip, a riding crop and a means of self protection. Unlike most western style whips, the Sjambok is not plaited from thin leather strips. Instead, it is carved whole out of Hippopotamus hide. Its considerable reach, lightning speed and devastating impact have built it quite a reputation as a sure defense against deadly snakes.

And since the Sjambok is swung like a rod, not cracked like a bull whip, its weight, speed and flexibility does all the work and little physical strength is required.

#### SYNTHETIC SJAMBOKS

The Sjambok was adopted by the South African police as a riot control weapon. Because of the large numbers of Sjamboks that were needed, the issue item was made from precision molded black plastic. Give one a try and you'll see why it has earned its awesome and well deserved reputation.

Specifications: Sjambok	
Available in three lengths, 36", 41, and 54"	
Diameter at butt: 1"	Diameter at tip: 3/8"
Extruded virgin black plastic.

## SPECIALTY

## LATHI (LAH-TEE)

India is a society of over a billion people speaking hundreds of different dialects and worshipping through a multitude of religions. Strife and civil disorder can flare up and often the only defense against anarchy is the Indian police, who rely on one main weapon in crowd control... A four foot long Lathi! Issued as standard equipment, and used as a crowd control device, the Lathi is most popular for its versatility and non-lethal effectiveness.

Available in three different sizes, these rattan staffs are manufactured with the bark left on them, making them virtually impervious to the elements.

Specifications:	3 ft. Training Stick	4 ft. Lathi	6 ft. Lathi
Length:	36"	48"	72"
Diameter:	3/4" to 1"	1 1/8" to 1 1/4"	1 1/8" to 1 1/4"
Weight:	13.7oz.	1lb. 3 oz.	2lb. 2.7 oz

All weights and measures for Lathis are approximations.

#### A word about rattan...

Despite its resemblance to bamboo, Rattan is not hollow. It is composed of thousands of tough, thin fibers that are densely packed together and encased in a smooth hard skin. This construction gives it enormous strength and substantial flexibility. Rattan sticks flex rather than break. So when they strike hard objects, they absorb shock rather than transfer it to the user. The bark is left on because it adds tremendous strength to the rattan. In fact, when combined with the fiber core, it is tough enough to offer good defense against even edged weapons. Our Lathis are made of select Rattan of the highest quality. They are picked for us by one of the major suppliers of Lathis to the Indian Government.

## CITY STICK

Here's a classy walking stick that's just at home at the opera as it is on a stroll through the urban jungle. Our new City Stick fits any situation and is just as functional as it is good looking. Its glossy black shaft is made out of eleven layers of fiberglass which, in impact tests, proved to be unbreakable. It's topped with a mirror polished "head" made of 300 series stainless steel and features a thick rubber ferrule at the base for excellent traction.

## QUARTERSTAFF

The Quarterstaff has been the traditional weapon and constant companion of the European peasant for centuries. Its simplicity and utility as a hiking staff and its effectiveness as a weapon, prompted us to make our own version.

The Cold Steel® Quarterstaff is 6ft long by 1 1/4" thick and precision turned from premium quarter sawn white ash. Ash, is a tough, hard wood which, when quarter sawn so the grain runs in the same direction (no cross grain), is very resistant to breaking—even under extreme impact forces. To add its durability, it is equipped with a thick, brass-washed steel ferrule.

## WHITE WAX WOOD STAFF

The wood from White Wax Wood saplings has been prized in China for thousands of years. It is an ideal material from which to fashion staffs, spear shafts, and walking sticks, because it is tough, hard and flexible and can absorb shock without breaking (we were skeptical about this wood's reported virtues until extreme impact testing revealed how durable this Wax Wood really is).

Each measures 2" in diameter at the butt and tapers to approximately 1" at the tip. They are ideal "as is" for use as a virtually unbreakable spear shaft or can be cut down to a smaller length as a walking, hiking, or training stick.

Specifications:	City Stick	Quarterstaff	White Wax Wood Staff
Length:	37 5/8"	6 ft.	6 ft.
Diameter:	1 1/16" (base) 1 11/16" (head)	1 1/4"	2" (Butt) to 1" (Tip)
Weight:	20.5oz.	32.5 oz.	36.7 oz.

All weights and measures for White Wax Wood Staff are approximations.

Counter Top Display (#DC1)  
Rotates 360° at its base

Cold Steel® has a variety of stands available. Each display is specially designed to show Cold Steel® products in an appealing fashion.

All of our displays are made of clear Lucite and are detailed with the Cold Steel® logo.

The large display (shown here at left) has five double sided shelves for displaying a wide assortment of Cold Steel® knives.

This jet-black tee has the distinctive Cold Steel® logo with the phrase "World's Strongest Sharpest Knives.™" silkscreened in large letters on its back and in smaller letters on the left front chest. 100% pre-shrunk, extra heavy cotton.

## COLD STEEL® HAT

Tell 'em you love Cold Steel® with this premium quality hat! The sturdy, black cotton/polyester twill makes this hat both handsome and comfortable! The embroidered design has the Cold Steel® logo with the phrase "World's Strongest, Sharpest Knives.™" Features a "one size fits all" adjustment band on back for a good fit.

## "SWORDSMAN" TEE

The Cold Steel® "Swordsman" 100% cotton Tee features a silkscreened image of a classic Samurai figure! The Kanji characters meaning "Master Bladesmith" are on the front and back of the shirt..

## POLO SHIRTS

Our Polo-styled shirts are available in white or navy blue and come with our distinctive logo embroidered on the left side of the chest. As an added feature, we have included an embroidered image of our Tanto just above the cuff of the left sleeve. 100% cotton pique, clean finished three-button placket, welt collar and cuffs with woodtone buttons.
