**"A man who stands by his
convictions, never stands
alone" -Ernest Emerson**

WWW.EMERSONKNIVES.COM

310-539-5633

"You have committed every crime under the sun. Where you have been the least resisted you have been the most brutal."

We will have no truce or parley with you, or the grisly gang who work your wicked will. You do your worst and we will do our best."

-Winston Churchill

America. Land of the free and the home of the brave. America, the beacon of hope to all those oppressed. America, the last refuge of hope to rid the world of evil. You can dislike her. You can criticize her. You can even hate her, but when the time comes, when you are truly in need you know that she will be there for you. She will be the first to fight, the first to spend her most precious resource on your behalf.

That call shall come again. And we will be ready. Like we always have. We must be ready. We must gird our loins for the upcoming struggle that we may face. We must be prepared to once again fight the good fight.

The enemy will do his worst. America will do her best. I will do my best to help her every way I can.

God Bless America,

Ernest Emerson

THE ETAK™

Emerson Tactical Assault Knife

"The process of evolution does not
just apply to animals."

-Ernest Emerson

In terms of Tactical Assault Gear and Weaponry there is a long historical record, as old as man himself, of the continuous evolution of strategies, tactics, technology, and weaponry. Here is the latest edged weapon evolution of Tactical Combat Cutlery from Emerson Knives, the Emerson Tactical Assault Knife, E.T.A.K. This knife features the latest in tactical knife design from the father of the modern tactical knife. This knife has everything a Tactical Knife should offer, advanced design, legendary "Emerson Ergonomics," combat proven materials, and the rock solid reputation of Emerson Knives, known throughout the world as being "the best for the best."

SPECS:

Overall Length: 9.0 in.
Blade Length: 3.9 in.

This is the next generation of Emerson Assault Knives that brings a lifetime of experience and knowledge to your hands. The ETAK model will fit the needs of anyone who goes into harm's way, as a knife that will perform flawlessly as an emergency tool, a combat tactical weapon, or a utility knife. In the words of Ernest Emerson, "I brought all my experience and skills to life on this design. And once you own one you will both feel it and hear it. Because it just screams to be used hard."

New! BULLDOGS™

"When it comes to Tactical Folder Makers,
none have moved the earth like Ernest Emerson"
-Blade Magazine

SPECS:

Overall Length: 7.6 in.
Blade Length: 3.1 in.

SPECS:

Overall Length: 8.9 in.
Blade Length: 3.7 in.

Some knives just breathe an uncompromising personality of strength, toughness, and a hard headed, stubborn attitude. So it is with the Emerson Bulldog. These rugged S.O.B.'s are all of those things with a razors edge. The funny thing is that this knife is the knife that almost wasn't. There's a story behind that. Ask me sometime and I'll tell you. This knife was built solely on the decision of public demand. Anyway, I think it was the right decision to make it because after all, it was what you wanted. And I agree with that decision. Get one of these Bulldogs for yourself and I bet you'll agree too.

The Karambit Knife is simply a claw. Nature is the ultimate designer of efficiency. If a predator's tools don't work, the predator becomes prey. It's really that simple. The Karambit blade is designed after the universal curve found on the claws of all apex predatory animals. It is seen in the velociraptor's claw, the claw of the tiger, and an eagle's talon which are all essentially identical except for their size. The Emerson Karambit also follows that same curve.

COMMANDERS™

MINI COMMANDER
Overall Length: 8.0 in.
Blade Length: 3.4 in.

COMMANDER
Overall Length: 8.75 in.
Blade Length: 3.75 in.

SUPER COMMANDER
Overall Length: 9.50 in.
Blade Length: 4.0 in.

The Commander. Sometimes a piece of gear has everything you need. It's just right. The Emerson Commander is as near to perfection as you can get. The Commander is the first knife to feature the Emerson "wave shaped feature" and has since been known as the fastest deploying knife in the world. There are very few knives in the world that receive the attention that the Commander demands when an operator pulls one out of his pocket. Seemingly open when it comes out of the pocket, the knife definitely commands respect. Commanders, both mini and full-sized, are in action in every theater of combat in the World. They are recognized by soldiers around the globe as one of the best Combat Folding Knives ever developed.

CQC-7™

“...the CQC-7 literally defined what a production tactical folder should be”

-Blade Magazine

MINI CQC-7

with “wave shaped feature”

Overall Length: 7.2 in.

Blade Length: 2.9 in.

SUPER CQC-7

with “wave shaped feature”

Overall Length: 9.15 in.

Blade Length: 3.78 in.

The Emerson CQC-7 is the most influential knife of the last 20 years and will go down in history as the most influential Tactical Knife of all time. This is the tactical knife that set the standards and changed the face of knifemaking forever. There is no one who can challenge that.

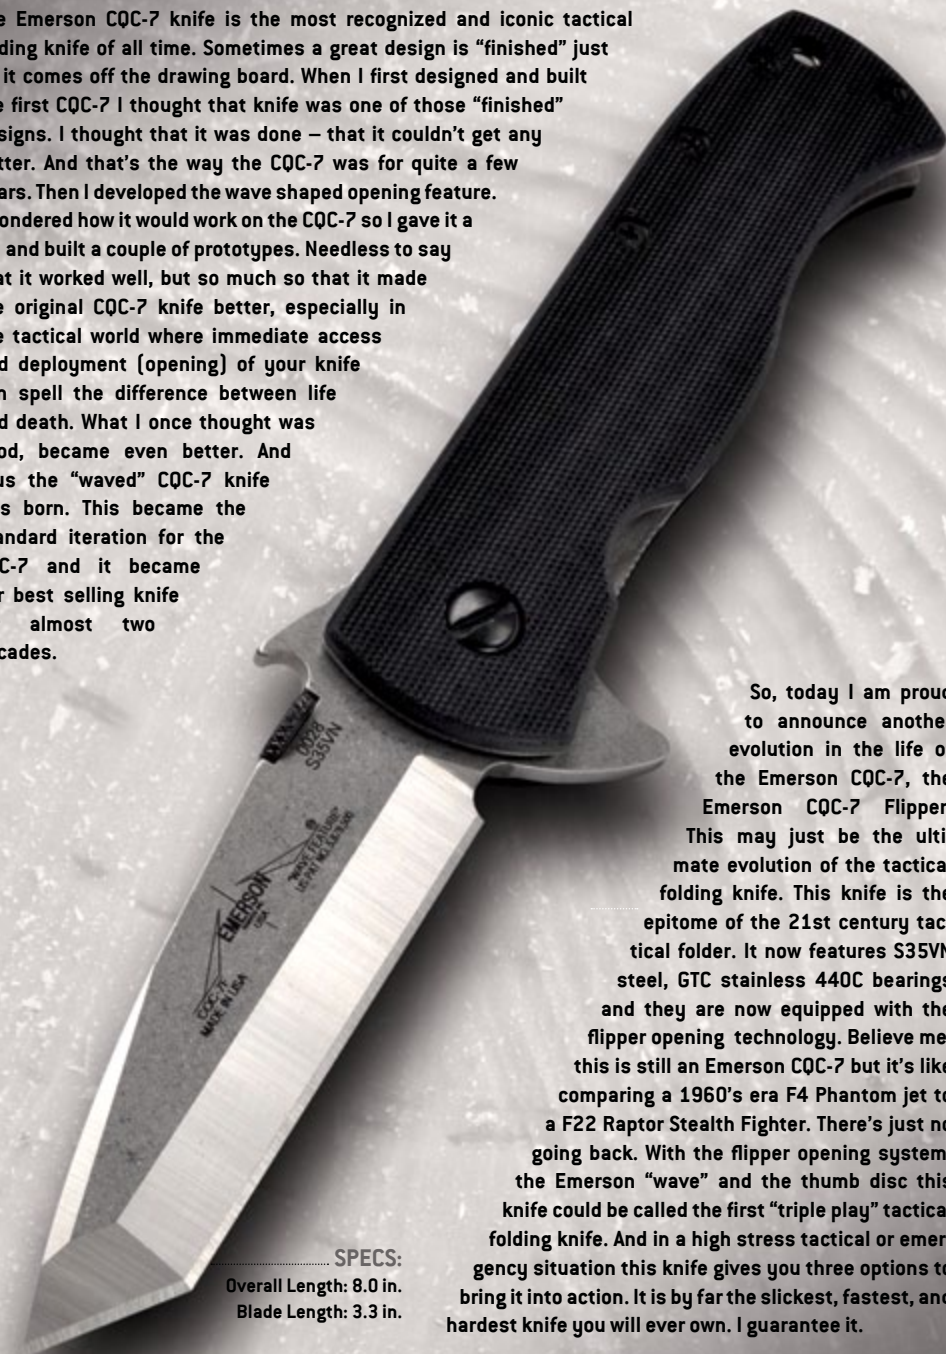

Available in five variations, from large to small, you should never be without one whether you are taking your family to the movies or kicking down a door in Iraq. The CQC-7 has been places not found on any road map - places known only to the select few who have known the heat, sweat, and chaos of conflict. It is there now and it will be there again whenever called to action. Simply called “The Seven” by most operators.

CQC-7 Flipper™

“I’ve carried Emersons on every operation since 1997, from the Balkans to the Sand Pit”

- D.L. King (Cobra) - Joint US/European Counter Terrorist Strike Force

The Emerson CQC-7 knife is the most recognized and iconic tactical folding knife of all time. Sometimes a great design is “finished” just as it comes off the drawing board. When I first designed and built the first CQC-7 I thought that knife was one of those “finished” designs. I thought that it was done – that it couldn’t get any better. And that’s the way the CQC-7 was for quite a few years. Then I developed the wave shaped opening feature. I wondered how it would work on the CQC-7 so I gave it a try and built a couple of prototypes. Needless to say that it worked well, but so much so that it made the original CQC-7 knife better, especially in the tactical world where immediate access and deployment (opening) of your knife can spell the difference between life and death. What I once thought was good, became even better. And thus the “waved” CQC-7 knife was born. This became the standard iteration for the CQC-7 and it became our best selling knife for almost two decades.

So, today I am proud to announce another evolution in the life of the Emerson CQC-7, the Emerson CQC-7 Flipper. This may just be the ultimate evolution of the tactical folding knife. This knife is the epitome of the 21st century tactical folder. It now features S35VN steel, GTC stainless 440C bearings and they are now equipped with the flipper opening technology. Believe me, this is still an Emerson CQC-7 but it’s like comparing a 1960’s era F4 Phantom jet to a F22 Raptor Stealth Fighter. There’s just no going back. With the flipper opening system, the Emerson “wave” and the thumb disc this knife could be called the first “triple play” tactical folding knife. And in a high stress tactical or emergency situation this knife gives you three options to bring it into action. It is by far the slickest, fastest, and hardest knife you will ever own. I guarantee it.

SPECS:

Overall Length: 8.0 in.

Blade Length: 3.3 in.

SHEEPDOG™

This model is the first Emerson flipper which also features the new bearing system. Lt. Colonel David Grossman is an icon in the Military and Tactical world. A former Airborne Ranger and West Point Instructor, he is the world's leading authority on the effects of stress and combat and how they affect an individual when faced with life and death decisions in that environment. He is the author of two groundbreaking books, "On Killing" and "On Combat" which are now regarded as required reading for anyone who must go into harm's way.

Needless to say, I was both humbled and honored when Colonel Grossman approached me in regard to making an official knife for him and his company, "Sheepdog Knife and Gun."

SHEEPDOG BOWIE

Overall Length: 8.4 in.
Blade Length: 3.5 in.

SHEEPDOG SPEARPOINT

Overall Length: 8.4 in.
Blade Length: 3.5 in.

"It's important that the user must be able to open the knife under high stress so I'd need it to have a flipper. With your wave, thumb button, and flipper it'll be the most deployable knife ever built, even in a gross motor skills environment. The rest of the design I'll leave up to you," he told me.

And off I went. The "Sheepdog Knife" a design that I came back with is a medium size folder with some important features that are entirely new to Emerson Knives. It is the first Emerson design to feature a bearing system in the pivot rather than a washer system and the first Emerson knife to feature a "flipper." In these regards it's like no other Emerson design ever. I made the knife available in both a bowie style blade and a brutish spearpoint design. Knowing that this knife is specifically designed for both police and military use, these two blade styles make the most sense for a utility/defensive knife. Mr. Grossman was extremely pleased with the results and I know you will be too. Go ahead and decide for yourself, I know you'll be pleased with the result.

CQC-7V™

The CQC-7V is a double V-ground version of the infamous Emerson CQC-7B knife known the world over. This beauty features striking, coarse, super grippy G-10 handles holding a dramatic stone-washed CQC-7 blade that is precisely ground on both sides, front and back, giving you a razor sharp cutting machine. If you've ever thought about getting a CQC-7 but hesitated because of the chisel grind, then your wait is over.

SPECS

Overall Length: 8.0 in.
Blade Length: 3.3 in.

CQC-8™

"I feel Emerson's understanding of what a knife should be and what a knife should do every time I open mine up to use it." -D.T., USAF Special Operations

MINI CQC-8 "HORSEMAN"

Overall Length: 8.3 in.
Blade Length: 3.5 in.

CQC-8

Overall Length: 9.3 in.
Blade Length: 3.9 in.

SUPER CQC-8

Overall Length: 10.2 in.
Blade Length: 4.3 in.

The CQC-8 model has long been considered one of the best combat designs that I have ever produced. I agree. The ergonomics and blade design have merged in the knife to form the perfect union. Perfectly balanced in both a forward and reverse grip, the CQC-8 is a battle-hardened veteran that you want at your side. Now in three sizes, the CQC-8 has evolved to meet the demands of those who need a knife that will protect and serve; ranch, range, or battlefield - anytime - anyplace.

PATRIOT™

"There is no better Knife"

- Billie - US Special Operations - Afghanistan

There are few words that conjure up as much emotion and feeling as the word patriot. And no one name better embodies that spirit as vividly as George Washington. Without George Washington there would be no United States. There would be no America in this world as we know it. I designed this knife to embody the legacy of our Country's founding father, strength, honor, and a resolve forged in the fire of conviction. A conviction that there is always a responsibility to a higher calling. This knife, the Emerson Patriot is a humble working mans knife, just like the backbone of Washington's Army, the men and women who stepped forward into the breach to fight for an ideal that they knew was right and just. This knife is available in two variations including the special edition made with wood from a tree on George Washington's Farm that was alive when George Washington was the President of the United States of America. And just like George Washington they will never quit, will never give up and will always be ready to step into the breach for what is right and just.

Standard Model

Two Hundred Fifty Year Old Oak
from George Washington's Farm

SPECS:

Overall Length: 9.2 in.
Blade Length: 3.9 in.

ROADHOUSE™

Think Whiskey, think Choppers, think Rock 'n' Roll and you'll know what the Roadhouse is all about, and the moment you pick it up, you'll know why it lives up to its name.

MINI ROADHOUSE

Overall Length: 8.0 in.
Blade Length: 3.4 in.

ROADHOUSE

Overall Length: 8.9 in.
Blade Length: 3.8 in.

The more that I handle this knife, the more I'm thinking this is one of my best designs. Just like a chopped Harley, this knife is low slung and ready to roar. It feels like you've just dropped the clutch and it's trying to jump out of your hand. And just like a Harley, you've got to have a Rock 'n' Roll, Outlaw's soul to carry a Roadhouse. If a chopper could be a knife it would be the Roadhouse. This is a bad to the bone fighter with a Rebel's soul and a Rock 'n' Roll attitude that cannot be tamed. Pick it up and you can just about smell the Whiskey. This knife is destined to be an Emerson classic.

CQC-15™

"I've run into guys carrying Emersons in the most God-Forsaken hell holes on this planet"- X-Man - CIA Special Activities Division - The Stans

MINI CQC-15

Overall Length: 7.90 in.
Blade Length: 3.50 in.

CQC-15

Overall Length: 8.9 in.
Blade Length: 3.9 in.

The CQC-15 and its new little buddy, the Mini-CQC-15 are one helluva couple. Featuring the piercing point of the CQC-7 and the graceful cutting efficiency of the Commander - this is what you get with the CQC-15. This knife with a comfortable, secure, ergonomic handle gives you the best of both worlds. The CQC-15 is truly one serious knife. It features a tanto/recurve blade combo that suits its use in any environment, from the board room to the deployment staging area. This knife has already hit the streets of Baghdad and has been moving quick and quiet. The CQC-15 is a sturdy, aggressive knife that will definitely get you out of a jam if you ever need it.

CQC-10™

The CQC-10 represents what I've always described as a straight-forward, go - ahead design. It feels great in the hand and features a brutish spear point blade profile. This knife gained fame as the official, "Real" knife of H&K and is now in the hands of operators all over the globe. Emerson Knives now offers the CQC-10 directly. The only feature that has changed is the logo. This knife represents a great choice for both Military and Law Enforcement because of its true utilitarian design. A great blade coupled with legendary "Emerson Ergonomics" results in a knife that will perform - no matter what the task.

SPECS

SARK

P-SARK

SARK™ P-SARK™

SPECS

Overall Length: 8.2 in.
Blade Length: 3.5 in.

I developed the Search and Rescue Knife (SARK) at the specific request of the United States Navy for a waterborne rescue knife that would perform safely and efficiently under emergency conditions. You can now see clones of this design in many other knife companies catalogs and with good reason. The SARK is just about the best rescue knife ever developed. It's safe, strong, and it's an Emerson. As the knife gained notoriety, Police departments began requesting that we provide the design with a point rather than the safety tip for patrol officers. As a result there is both the original SARK and the Police SARK (P-SARK). In both configurations, it is a wonderful rescue tool and has been used successfully in many, many rescue and life saving operations. If your job is saving lives, then get the knife that was designed just for you.

KARAMBIT-T

TRAINER

THESE ARE NOT TOYS. Now you can train safely in the deployment and use of your Emerson Knives. These are real, fully functional folding knives with DULL steel blades. Finished with internationally recognized "Safety Blue" handles, these are the same knives used in the Emerson Combat System Courses. These trainers are so effective that they are now even being used in some areas where "live" (edged) weapons would not be permitted. They have proven to be extremely effective come-along tools as well as trainers. Take your training to the next level in realism with the finest REAL training knives on the market.

POLICE UTILITY KNIFE™

PUK

Everybody makes a fixed blade police knife. Everybody makes a great big Bowie-style knife for police. That is not what they need. The Emerson Police Utility Knife was developed as a result of years of working hand-in-hand or, I should say, Hand-to-Hand with hundreds of police officers. I found that the knife the officers really needed was not a great big wall hanger, but rather a fixed blade knife that was compact and stout, something they could use and actually carry. They wanted a fixed blade that was about the same size as an opened folding knife, with a secure handle and sharp, stiff blade. The Emerson Police Utility Knife is the result of the experience that no other knife company can bring to the table.

SPECS
Overall Length: 8.3 in.
Blade Length: 3.6 in.

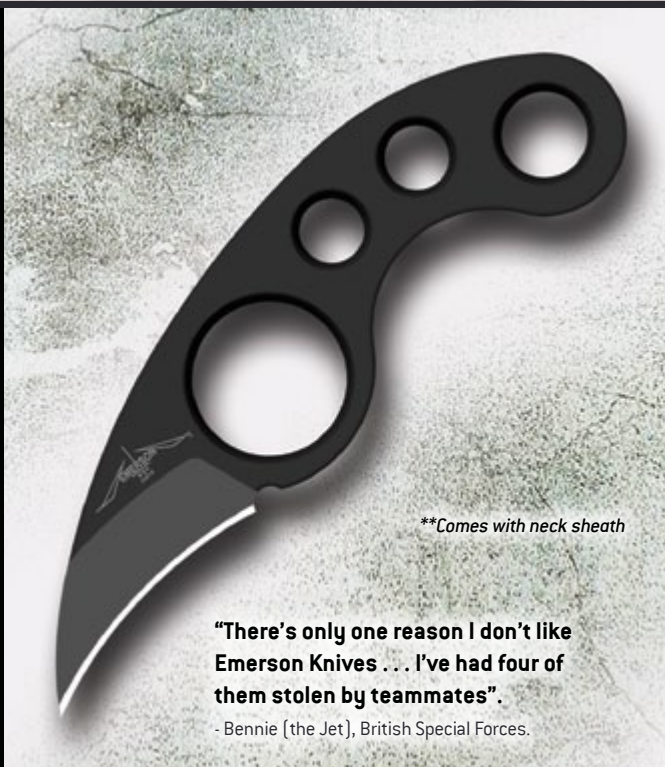

"You can't buy reputation. It must be earned." -Spyder - US NAVY SEAL - IRAQ

LA GRIFFE

THE CLAW

The La Griffe is a design from Frederic Perrin, the well-known European knife maker and combatives trainer. The Griffe is the ultimate back-up weapon, and is carried by many police and military personnel as their last chance backup piece. The unique design allows you to secure the knife in your hand by inserting your finger through the handle. It will not be dislodged from your hand in either the forward or reverse grip. This is another Emerson Knife that has proved to be so successful that several other knife companies have copied the design. Get the original, not a cheap, foreign-made copy.

SPECS
Overall Length: 4.9 in.
Blade Length: 1.75 in.
Neck Sheath: Kydex

****Comes with neck sheath**

EMERSON "WAVE SHAPED FEATURE"

PAT NO. # 5,878,500

The Emerson "wave shaped feature", also called the remote pocket opener, is the most dynamic and advanced feature ever designed for folding knives. This device allows you to open the knife literally, as it is removed from the pocket. This makes any Emerson Knife with the "wave shaped feature" the fastest deploying folding knife in the world. Faster than an automatic, your knife is open as it comes up into your hand-ready for use. The Emerson "wave shaped feature" is now officially required on all the knives we supply to the Military Combat units, Military Search and Rescue units and Law Enforcement agencies.
