

A close-up photograph of a person's hands using a folding knife to start a fire. The person is wearing a dark jacket and a dark shoe. The knife has a dark handle and a silver blade. The fire is made of sticks and leaves, and it is glowing brightly. The background is dark and blurry, suggesting a forest at night.

bestMAN

bestMAN is the new SlipJoint knife by lionSTEEL. The Company goes back in time, back to the classics, developing a modernized version of this knife using innovative technology and quality materials. bestMAN comes in two variations: one M390 stainless steel Clip blade or two blades, Clip and Wharncliffe; bolsters are made out of titanium and the handle scales are available in different fine woods, carbon fiber or natural Canvas. Dimensions and weight make it the ideal EDC folder, bestMAN is your close friend that helps you in the everyday duties and it's always with you in the best of times.

BM1 ST - Santos Wood

BM1 CVN - Natural Canvas

BM1 EB - Ebony

ROK ROK is the new Solid folding knife by LionSteel and it represents the achievement of a strong technological growth and a new flow of creative energy for the Company. The embedded features make the knife more comfortable and secure to be used, allow the final user to choose how to use his knife and to have immediate info about the ROK and LionSteel in wider terms.

NFC: this cool technology has been recently used for different payment methods and logistics, through the use of cards and smartphones... Here it also allows you to check ROK details, activate your warranty, contact the customer service and get all the info about LionSteel world directly from the smartphone app from the App Store at the center of the device.

ROTOBLOCK

this security system was born together with the first solid knife, the SR1, it allows the locking of the blade while the knife is on use. So there's no risk to accidentally close it while in action.

ReF

(Removable flipper system)

this feature was born together with the T.R.E. system in the beginning, then it's been used for other knives. It's very useful because it permits to choose how to use the knife, if you don't want the flipper you can unscrew it using the torx tool and put the second screw you find in the box that perfectly fits the hole in bottom of the blade.

H.WAYL

(Hide What Annoys You LionSteel)

this system makes it easier when you put the knife back in your pocket and also when you want to pull it out, just push the button and the clip will appear. At the same time the clip is hidden when you use the knife and you don't annoyingly feel it on your palm when you hold the ROK in your hand.

SOLID® Knife

LionSteel made its first Solid knife back in 2010 and it's been the starting point for the Company revolution... When a new Solid knife comes to life it's always exciting and with the ROK a higher quality outcome has been reached. The frame comes out milling a single solid piece of titanium or aluminum, so the handle is a single strong element of the knife.

The IKBS ball bearing system improves the knife opening and closing movements, and it guarantees a fast and smooth action.

ROK DAMASCUS

The **ROK** high end version is built with a Solid Ti6Al4V titanium monolithic frame lock handle that is available in shiny blue or gold anodized variations. It features a Chad Nichols Scrambled Stainless steel blade and the machined clip is made with the same Damascus style. In the new smart and refined packaging there are included the NFC connector and the torx key ring with T6 and T8 tools. The knife features all the LionSteel technologies.

Design by Molletta

ROK DD BL

ROK DD GL

Blade length: 83 mm. – 3.27 in.
Blade thickness: 4,5 mm. – 0.18 in.
Total length: 198 mm. – 7.80 in.
Total weight: 163 gr. – 5.75 oz.

Frame: Ti6Al4V

Blade steel: Chad Nichols Scrambled Damascus
Packaging: Cardboard rigid box

ROK TITANIUM

ROK is built with a Solid Ti6Al4V titanium monolithic frame lock handle available in natural grey with blue clip, or matt bronze with grey clip variations. It features a M390 Stainless steel blade while the machined clip is made in titanium. The packaging is the same of the Damascus one, so there are included the NFC connector and the torx key ring with T6 and T8 tools.

Design by Molletta

Blade length: 83 mm. – 3.27 in.
Blade thickness: 4,5 mm. – 0.18 in.
Total length: 198 mm. – 7.80 in.
Total weight: 159 gr. – 5.60 oz.
Frame: Ti6Al4V
Blade steel: M390 Bohler 60-61 HRC
Packaging: Cardboard rigid box

ROK G

ROK B

ROK ALUMINUM

ROK is built with an Ergal aluminum monolithic frame lock handle available in black, red or orange color. It features a M390 Stainless steel blade, it can be satin or black MilSpec finished. The aluminum machined clip has the same color of the handle when the blade is satin, while it's black when the blade is MilSpec. There's another dedicated packaging for the aluminum ROK that still includes the NFC connector and the L torx tool.

Design by Molletta

Blade length: 83 mm. – 3.27 in.
Blade thickness: 4,5 mm. – 0.18 in.
Total length: 198 mm. – 7.80 in.
Total weight: 126 gr. – 4.44 oz.
Frame: Aluminum
Blade steel: M390 Bohler 60-61 HRC
Packaging: Cardboard rigid box

B40 ST - Santos Wood

B40 UL - Olive Wood

The sharp-cornered extended tang can be scraped against the fire striker steel rod, so that it generates the sparks needed to light the fire. For the final user it is safer to proceed in this way, since the knife can be held when inside the sheath, so there's no risk to slip to the edge of the blade.

B40

LionSteel range of fixed blade knives is finally enriched with the new born "B40" Bushcraft knife. The B40 is the ultimate tool for the natural life enthusiasts, great for wood carving thanks to the stonewashed Sleiþner stainless steel blade and fire-crafting using the back flat tang. It's easy to be handled because of its light weight and average dimensions, it's very comfortable for its 3D milled grip. There's a more traditional variation with Olive or Santos wood handle and then there's the technical one with G-10 and Micarta handle. It comes with a brown leather sheath perfectly shaped for its profile.

Design by Molletta

B40 GOR - Orange G10

B40 CV G - Green Canvas

B40 GBK - Black G10

Blade length: 98 mm. – 3.86 in.
Blade thickness: 3,8 mm. – 0.15 in.
Total length: 223 mm. – 8.78 in.
Total weight: 208 gr. – 7.34 oz.
Handle: olive or Santos wood, G10, Micarta
Blade steel: Sleiþner stainless
Sheath: Brown leather

LionSteel WARRANTY

LionSteel knives are designed and built for use as cutting tools. Use of our knives for any purpose other than cutting is considered abuse. As with any tools LionSteel knives can wear out. They may also fail to perform if not used or cared for properly. Table test is an abuse of the knife unconditionally voids the knife's warranty.

WARRANTY INFORMATION:

LionSteel warrants that all of our products are free from defects in material and workmanship. If a knife or other product fails to function as it was designed, it should be returned to LionSteel's Warranty Repair Department for examination and evaluation of the problem. If we determine that there was a defect in materials or workmanship, we will repair or replace it with the same model or one of comparable value at our expense. If LionSteel determines that the problem with a knife was not due to a defect in materials or workmanship, we will assess our ability to repair the knife and provide a quote for those repair services. If LionSteel is unable to improve the condition of a knife, we will return it with the recommendation it be retired from use.

LionSteel's warranty policy does not cover any damage caused by disassembly, abuse, misuse, loss, improper handling, alterations, accident, neglect, improper sharpening, or normal wear. Repairs or modifications performed by any source other than LionSteel also unconditionally void the knife's warranty. All costs associated with shipment to returned product are the responsibility of the customer.

Please contact warranty and repair for more information:
