OUTBACK

The harsh environment of the Australian Outback was the inspiration behind the development of the "Outback" lockback knife. Unsurpassed strength and dependability was our goal, the Outback's rugged beauty and technological advancements were our rewards.

Designed and built by experienced craftsmen, the Outback knife begins with Schrade+ stainless steel to create a hand-honed clip blade for demanding projects. A special pivot-assembly using space-aged "Synergistic Surface Enhancement" is then implemented to provide superior strength and permanent lubricity. Heavy gauge liner construction and specially textured Thermoplastic Rubber handles insure a balanced, comfortable and secure grip under the most demanding conditions. A technologically advanced sheath utilizing trilaminate construction with a high density closed cell foam core molded specifically for the Outback knife provides a custom fit and added security.

Schrade's lifetime warranty is our promise to you that the Outback was "Built to last a lifetime."
